NOTICEBOARD
MARCH 2010

JUST A MINUTE:

Why can't we get prices over the phone

I received a call from one of our customers asking me "why don't you give prices over the phone and why do you insist on directing people to your website, which I feel is ridiculous?"

I replied "we were receiving up to 400 calls a day asking for prices (including general public), this resulted in customers like yourself wishing to place an order especially at the busier times of day struggling to get through".

The customer said "I never thought of it like that I am astonished at the amount of calls you get and can now understand the reasons why". At which point the customer thanked me for the explanation and said he would log on and have another look at using the website.

95% of all prices are visible without having to log in

The majority of the 200 watch factory prices are visible without being logged in, this is the same for other departments, Consumables, Tools etc.

I am sure you will understand there are a handful of price sensitive categories like Omega and Seiko where you do need to log in for pricing.

Please feel free to contact me if you have any comments or questions. All feedback welcome.

Best wishes

Phil Marshall

Director of Customer Service

- High Lustre Silicons (P1317K and Range)

FDK1020 £365.00

FOREDOM[®]

Drills &
Micromotors

Foredom Stone Setting/
Engraving Micromotor Kit

- The 1080 Micromotor is ideal for stone setting applications, including channel setting and engraving techniques requiring a hammering action
- The force of the impact of this reciprocating handpiece can be adjusted from light to full by turning the metal ring while the motor is off or running
- The speed of the hammer action can also be varied from 0-5,000 strokes per minute with the manual dial on the control box. Used with the Graver Holder, see below, the MH-011 Handpiece becomes a precision, power engraver - no need for an air compressor or a flexible shaft drive
- 1080 Stone Setting/Engraving Micromotor Kit includes the MH011 Hammer Handpiece, HP4917 Control (now same as rotary micromotor), H8-214 Graver Holder, Handpiece Tray and Accessories

Accessories included in Kit 1080

- 3 - Anvil Points with Threaded Shanks
- 1 - Adapter for Threaded Anvil Point
- 1 - Adapter for Non-Threaded Shank Accessories
- 1 - Grave Holder with Allen Key
- 1 - 5mm Open End Wrench, Accessories Tray, Handpiece Cradle, Spare Motor Brushes,
- 2 - Pins used to tighten Anvil Points,
- 1 - Anvil Point Holder used for shaping the point.

K1080CE £575.00

Engraving Handpiece Only

Has a slender, contoured grip and impact adjustment ring for precise hammering work. Operates from 0 – 5,000 strokes per minute.

- 6 1/4" overall length.
- 9/16" grip diameter
- 1" motor diameter
- 13 oz (369g)
- 1.5 amps (115V). 75 amps (230V).

MH011 £459.00

MICROMOTORS

Drills & Micromotors

Foredom Rotary Micromotor Kit

Drills & Micromotors
