Delft Clay Casting

The Delft clay method of casting consists of a mould and mouldable Delft clay, in which objects can be cast remarkably sharp and fast.

The Delft clay is reusable and cannot dry out due to its special composition. As a model one can use an existing piece of jewellery, clock and watch or a model made of hard material, like plastic, hard wax, wood, metal, stone, etc.

Brilliant for casting rings, bracelets, ear rings, jewellery bracelet links, clasp parts, chain links, mounts, pendants, lockets, badges, toe rings, bangles, medals, plaques.

Delft Clay Standard Kit

- Consists:
- 2 kg Delft Clay
 - Set of 60mm aluminium rings
 - Instructional DVD
 - Users Manual

Recommended Crucible Holder, Cousins Ref: H30620
