

MIYOTA

YOUR ENGINE

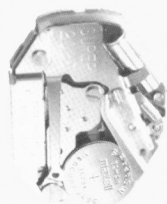

*2008/2009*

## **MIYOTA** is moving forward with powerful momentum

MIYOTA is the trademark of the watch movements sold to general watchmakers and manufactured by Citizen Watch Co., Ltd. Japan, an integrated watch manufacturer. MIYOTA movements are made in Japan, and over the past 30 years they have earned the support and trust of users worldwide. Our caliber 2035 movement has been very well received globally and has become the de-facto standard for the industry.

# MERCURY FREE BATTERY

# Hg

As a leading watch movement manufacturer, MIYOTA develops cutting-edge technologies, and it is also actively engaged in environmental preservation measures. MIYOTA maintains high standards that are even more demanding than the RoHS standard (EU Directive) introduced from July 2006. All MIYOTA movements manufactured after July 2005 are in complete compliance with the RoHS standard. We believe that this advanced compliance helps us to create new value in terms of our contribution to environmental preservation. In response to the increased global awareness of the dangers facing the environment, in June 2005, ahead of the rest of the sector, MIYOTA developed the CAL Super 2035 movement with a mercury-free (0% Hg) battery.

*Now, MIYOTA is undertaking a new initiative in which all its movements will become environmentally friendly products with mercury-free batteries by the end of 2008.*

At MIYOTA, we are deeply committed to the cause of protecting the global environment.

**Moving Toward a Better Future With MIYOTA!**
