

SEA-GULL

Since 1955

The Seagull Chinese movement factory is the largest manufacturer for Chinese mechanical movements (AKA the Chinese ETA!). CousinsUK can supply all of their calibres (some calibres the delivery time can be a long while).

Seagull movements are better quality and the supply is more reliable than other smaller factories which are copying/following Seagull in terms of manufacturing movements, so Seagull has the most variety in terms of functionality and due to superior quality can be more expensive.

See this Seagull Chinese watch movement brochure to help identification . For a quotation for calibres that are in the brochure but not stocked please use our "Add non listed item" functionality (if you require the Seagull version please state "Seagull" in the additional information).
