

## Hermle Barrel Numbers / Cousins Product Code / Calibre Application

The first 3 digits of Hermle calibres (ex. 340-) depict the main identifying reference number, usually stamped on the back plate (ex. 340\*020). We have included some complete calibres below only where occasional difference in application is present. Virtually all factory fitted barrels are stamped with their two digit number for guidance and x-reference to Cousins codes.

Barrel Nr	CMH Code	Time Side	Strike Side	Chime Side
10	H8228	140-	140-
