

Pivot polishing - NO problem!

Quicker and easier with the

ROLLIMAT

Pivot polishing automaton

Polishes in seconds:

ALL PIVOTS FROM 0,3 TO 4 mm Ø
including:

- minute-gears from pendulum-, pocket- and wrist clocks.
- anchor pivots from pendulum-clocks with long fork.
- plastic pivots
- and everything related to pivots

How to use:

- Measure out the rough pivot, wedge in the fitting groove, fix the pivot thickness.
- **Hold the work piece with your fingers, turn on the Rollimat for 1 to 2 seconds.**
- The pivot is ready and has a polish to the highest perfection from the widia polishing wheel.

All clock work- and striking mechanism pivots from 1 pendulum clock are - with some practice - polished in 5 to 7 minutes.

22x10 cm, 24 cm high, 4 kg, 220 Volt, 100 Watt
5 rotations from the Rollimat-turnhead in 1 second.

The Rollimat-turnhead is also available in auxiliary equipment for turning-lathes.

Patented nationally and internationally.
