

WATCH MOVEMENTS

WATCH MOVEMENTS BY BRAND

Watch Movements, Loose Pack & Pre-Sealed Descriptions

Loose Pack Movements

These movements have been supplied from the factory in non-sealed bulk packaging originally destined to be fitted to watch cases for the retail market. Whilst all will be complete and in working order, the lubrication may be subject to normal deterioration during transport and storage and may require some servicing prior to fitting.

ETA movements are generally supplied with standard height cannon & hour wheels, however this may vary with "Loose Pack".

Some watch movements have complicated functionality and procedures prior to start. Watchmakers must be aware prior to purchasing as this can be mistaken as the movement being faulty.

Swiss Sealed Pack Movements

These movements have been supplied in individual specially sealed packages designed to prevent any deterioration of lubricants and as such can be fitted directly without need of further lubrication or servicing, unless otherwise stated in the manufacturers data sheets.

Seiko Movements

Seiko do not supply new replacement movements, all Seiko movements are supplied refurbished by Seiko. Whilst all will be complete and in working order, they are not supplied in sealed packaging, subsequently the lubrication may be subject to normal deterioration during transport and storage and may require some servicing prior to fitting.

Cousins have a non returns policy on watch parts and watch movements. Watch manufacturers do not accept movements back as faulty. They state that it was not in this condition or faulty at the time of purchase / supply (basically saying if it is faulty then it was damaged by the customer). These restrictions are placed upon Cousins by the manufacturers. As a trade wholesale business to business supplier we unfortunately have to apply the same terms and conditions.

CHINESE MOVEMENTS

The Seagull Chinese movement factory is the largest manufacturer for Chinese mechanical movements (AKA The Chinese ETA!). CousinsUK can supply all of their calibres (some calibres the delivery time can be a long while).

Seagull movements are better quality and the supply is more reliable than other smaller

factories which are copying/following Seagull in terms of manufacturing movements, so Seagull has the most variety in terms of functionality and due to superior quality can be more expensive.

For identification & help see our document download area for the Seagull Chinese watch movement brochure. For a quotation for calibres that are in the brochure but not stocked please use our "Add non listed item" functionality (if you require the Sea Gull version please state "Sea Gull" in the additional information).

Popular Chinese Movements:

- ETA 2824.2 Chinese equivalent = Cousins Reference: TY2130M & TY2130GM
- ETA 2836.2 Chinese equivalent = Cousins Reference: TY2100M & TY2100GM
- ETA 2892.A2 Chinese equivalent = Cousins Reference: CHST18M
- UT 6497 Chinese equivalent = Cousins Reference: CHI3600M & CHITY36002M
- UT 6498 Chinese equivalent = Cousins Reference: CHI3620M & CHITY 36202BM
- Valjoux 7750 Chinese equivalent* = Cousins Reference: CH3LZF2M
- Valjoux 7753 Chinese equivalent* = Cousins Reference: CH3LZF1M

*check features match your specific movement Cousins has a computerised "multi location stock rotation system" which ensures our products are sold on a first in, first out basis, ensuring items with a shelf life are always supplied fresh.

Please Note:

- See Website for more information & larger Photos
- Part Sheets available via the "Document Downloads" department on our website
- All Movements and Watch parts are supplied on a non return-basis

ETA (ESA) MOVEMENTS

Please Note:

- See Website for more information & larger Photos
- ETA movements are generally supplied with standard height cannon & hour wheels, however this may vary with "Loose Pack"
- Part Sheets available via the "Document Downloads" department on our website
- All Movements and Watch parts are supplied on a non-return basis

Pre-sealed (Swiss Pack) Movements:

These movements have been supplied in individual specially sealed packages designed to prevent any deterioration of lubricants and as such can be fitted directly without need of further lubrication or servicing, unless otherwise stated in the manufacturers data sheets.

Loose Pack Movements:

Are exactly the same as pre-sealed except they were originally destined to be fitted to watches for retail but are surplus to requirement. Please See PDF via our "Help/FAQs" link on our website for full explanation.

SEIKO MOVEMENTS

Seiko do not supply new replacement movements, all Seiko movements are supplied refurbished by Seiko. Whilst all will be complete and in working order, they are not supplied in sealed packaging, subsequently the lubrication may be subject to normal deterioration during transport and storage and may require some servicing prior to fitting.

Please Note:

- See Website for more information & larger Photos
- Part Sheets available via the "Document Downloads" department on our website

• All Movements and Watch parts are supplied on a non-return basis

SELLITA MOVEMENT COMPLETE

Many independent watch manufacturers are now using mechanical movements made by the Sellita Watch Company of Switzerland.

The movements are based on the very popular ETA series of movements ETA produce, e.g. ETA 2824, 2834, 2836, 2890, 7750 series.

Some, but not all ETA movement parts are interchangeable with their analogous Sellita movements. We stock a complete range of parts which are available via the link below.

Sellita SW200.1 (Standard)

Quotes:

"Pretending to be Robin Hood while representing the establishment"

"the reliance on the "Swissness" premium also led to complacency"

"a state monopoly essentially fell into private hands and the consequences for the industry as a whole are felt to date"

"It was not Nicolas Hayek who revolutionized the watch business with the development and successful commercialization of the Swatch, but Ernst Thomke and his team."
