

DIN safety data sheet

Company: Lubra s.p.a.

Commercial product name: EMULSIBLE OIL K3
Chemical characterization:

Form: liquid	Colour: transparent
Odour:	Physical data at 20°: liquid
Density: ca. 1,069 Kg/l at 15°C	Fusion point:
Boiling point:	Solubility in water: complete
Vapour pressure:	Vapour density:
Flash point: flameproof	Ignition temperature:
Explosion limits: flameproof	

Hazardous reactions: none.

Transport: this emulsible oil do not fall under the transportation classification for dangerous products.

SAFETY MEASURES

Personal protective equipment: apron and gloves

Fires: use carbon dioxide, foam and chemical extinguishing materials

First aid: in case of accidental contact wash skin in running water & mild soap. After contact with eyes flush with plenty of water.

Inhalation: it is not dangerous as there is a minimum of volatility in normal conditions of use

Oral toxicity: not injurious

Disposal: under home laws

Applicable laws and regulations have to be considered.

Data is based on the present state of knowledge and experience, without any claim made for completeness.

Safety data sheet serves to describe the product only with regard to the safety elements. This data does not constitute a specification.
