Tube Cutting & Design

Made Easy

Tube Cutting Jig with Sizing Gauge

Cousins incredible value and best selling Joint Leveller is perfect and accurate for cutting tube/wire vertically, faultlessly.

- For the jeweller, silversmith, arts, craft, contemporary jeweller, model makers and light engineers.

- Easy tool for cutting tubing or rods.

- Made of precision steel with a contoured sturdy handle; also comes with a removable handle for mounting the jig in a bench vice.

- Capacity holding size 0 to 7mm

- Please note the gauge size (5) measures 0 to 30mm but the slide gauge actually extends up to 60mm.

- 250 grams

Cousins Ref: T31883
£20.75

How to use...

- Hold the handle (6), slide left to right to adjust to the desired size (4).
- Use the measuring gauge (5) to determine the tube/wire length size.
- Lock the hexagonal nut (7) on the back so slide (4) so the tube/wire does not move.
- With your thumb push down on the tube/wire with the securing/holding handle (2).
- Put your piecing saw blade into the slit (3).
- You can now start saw piecing the tube/wire vertically, accurately and with a flush finish.
