

Impressive Polishing & Texturing

When polishing, the smallest details can make the biggest impact, thus when polishing corners, grooves or holes etc it is integral to effectively finish and l or texturize to the highest possible standard.

A polished mirror finish on jewellery is certainly the most visually satisfying finish to the eye.

Texturizing adds contrast and distinction to jewellery and creates many different effects diversifying your hand made range.

Hand made items which have a highly polished and l or textured finish will impress friends and family alike, perfect to personalise your designs and completed pieces.
