

### Short Description

---

The Jeweller's Saddle Stool is designed to support a more natural seated position when working at the bench, making it well suited to detailed jewellery tasks and longer sessions. The contoured saddle-shaped seat encourages better balance and positioning while allowing greater freedom of movement.

Finished in durable tan PU, the seat surface is easy to wipe clean and suited to workshop use. Height adjustment allows you to set the stool to the correct working level, while the swivel function makes it easy to move and reposition as needed around the bench.

- Adjustable height for different bench setups
- Saddle-shaped seat for improved posture and control
- Durable tan PU upholstery, easy to clean
- Swivel seat for ease of movement
- Practical option for jewellers, setters and bench workers
- Easy assembly

### Main Description

---

The jeweller's saddle stool is designed for bench work where comfort, balance and freedom of movement are important. The shaped saddle seat helps support a more natural sitting position, allowing better control and stability when working on detailed pieces or spending longer periods at the bench. Its compact form makes it easy to move around the workspace without getting in the way.

Upholstered in durable tan PU, the seat is easy to clean and well suited to a workshop environment. The height can be adjusted to suit different bench levels, and the swivel action allows smooth movement while working, making it a practical seating option for jewellers, setters and other precision bench tasks.

Seat base 35cm x 40cm approx

Seat height (high point) fully up 64cm approx

Seat height (high point) fully down 46cm approx
