

# TITAN

## Titanium Anodiser

For the  
colouring  
of Titanium,  
Niobium  
& Tantalum

Precision voltage control with infinitely variable output across “low” and “high” ranges.

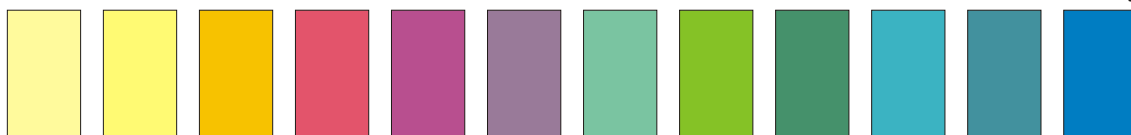

Digital meters for amps and volts, accurate to 0.1 volt to ensure colour consistency.

200-240ac volt supply, can be used anywhere.

Fitted water rinse.

Shielded anode and cathode connections.

Titanium cathode fitted.

*Samples of some of the  
achievable colours*

### Information

Beige textured polypropylene, resistant to all acids, alkalis and solvents.

54 long x 40 wide x 38 cms high 200-240 volts a.c. at 2 amps input,  
output 0 to 220 volts dc smoothed. Weight 18 Kg

*Titanium etch and clean  
salts available. Ask for  
“TITAN-ETCH” data sheet*
