

3.5TH GENERATION AUTOMATED ULTRASONIC WATCH CLEANING MACHINE

USER INTERFACE

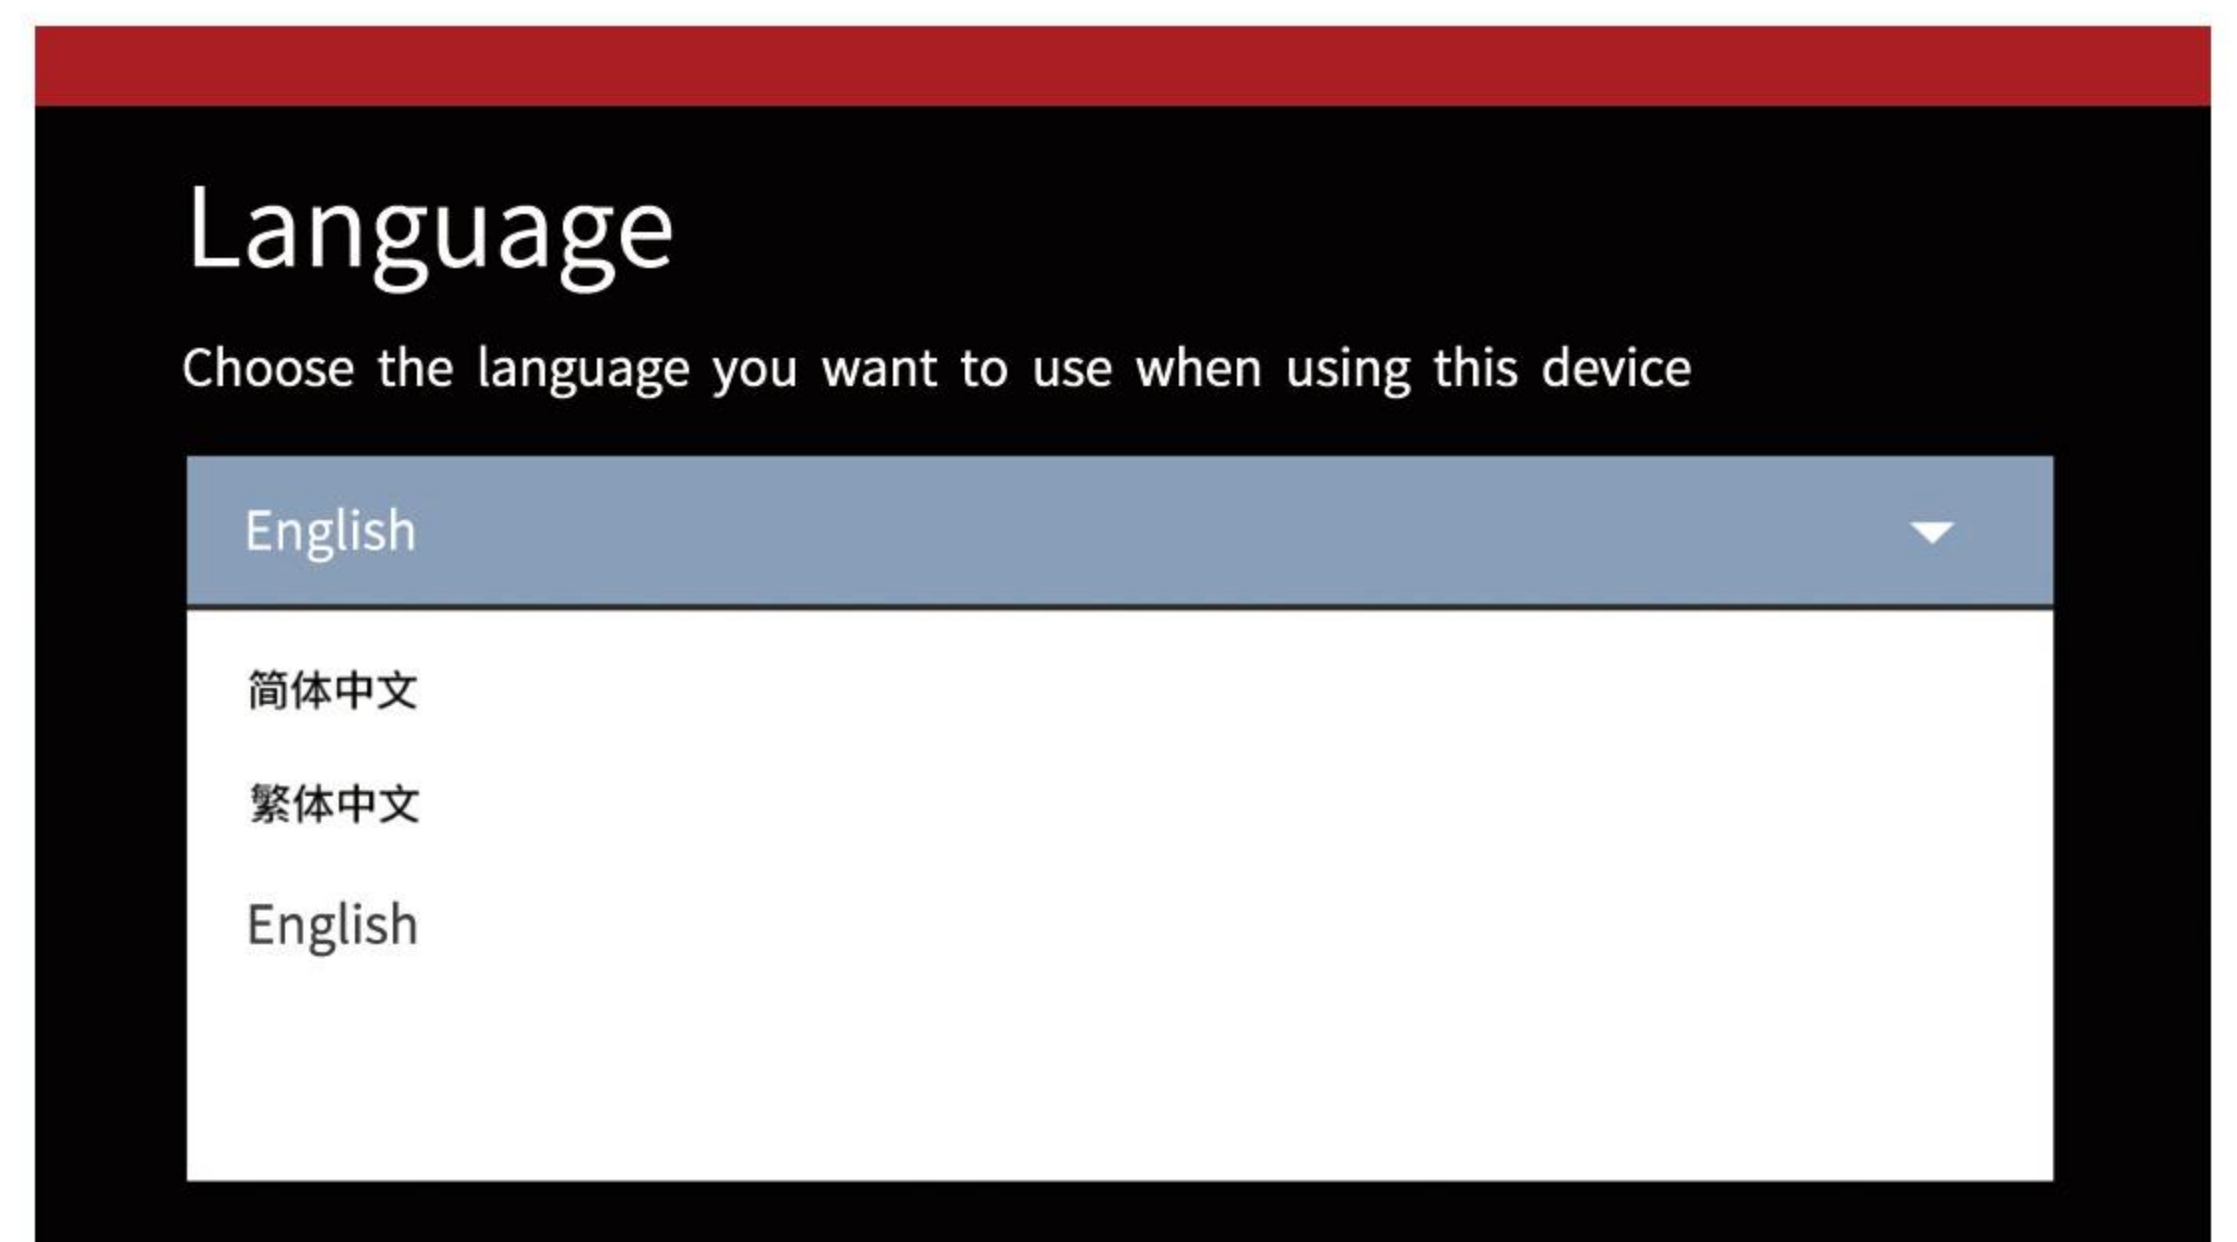

User-friendly UI, easy to setup.
Newly-designed power system, to enhance cleaning efficiency by above 30%.

COMPARTMENTS SETTING

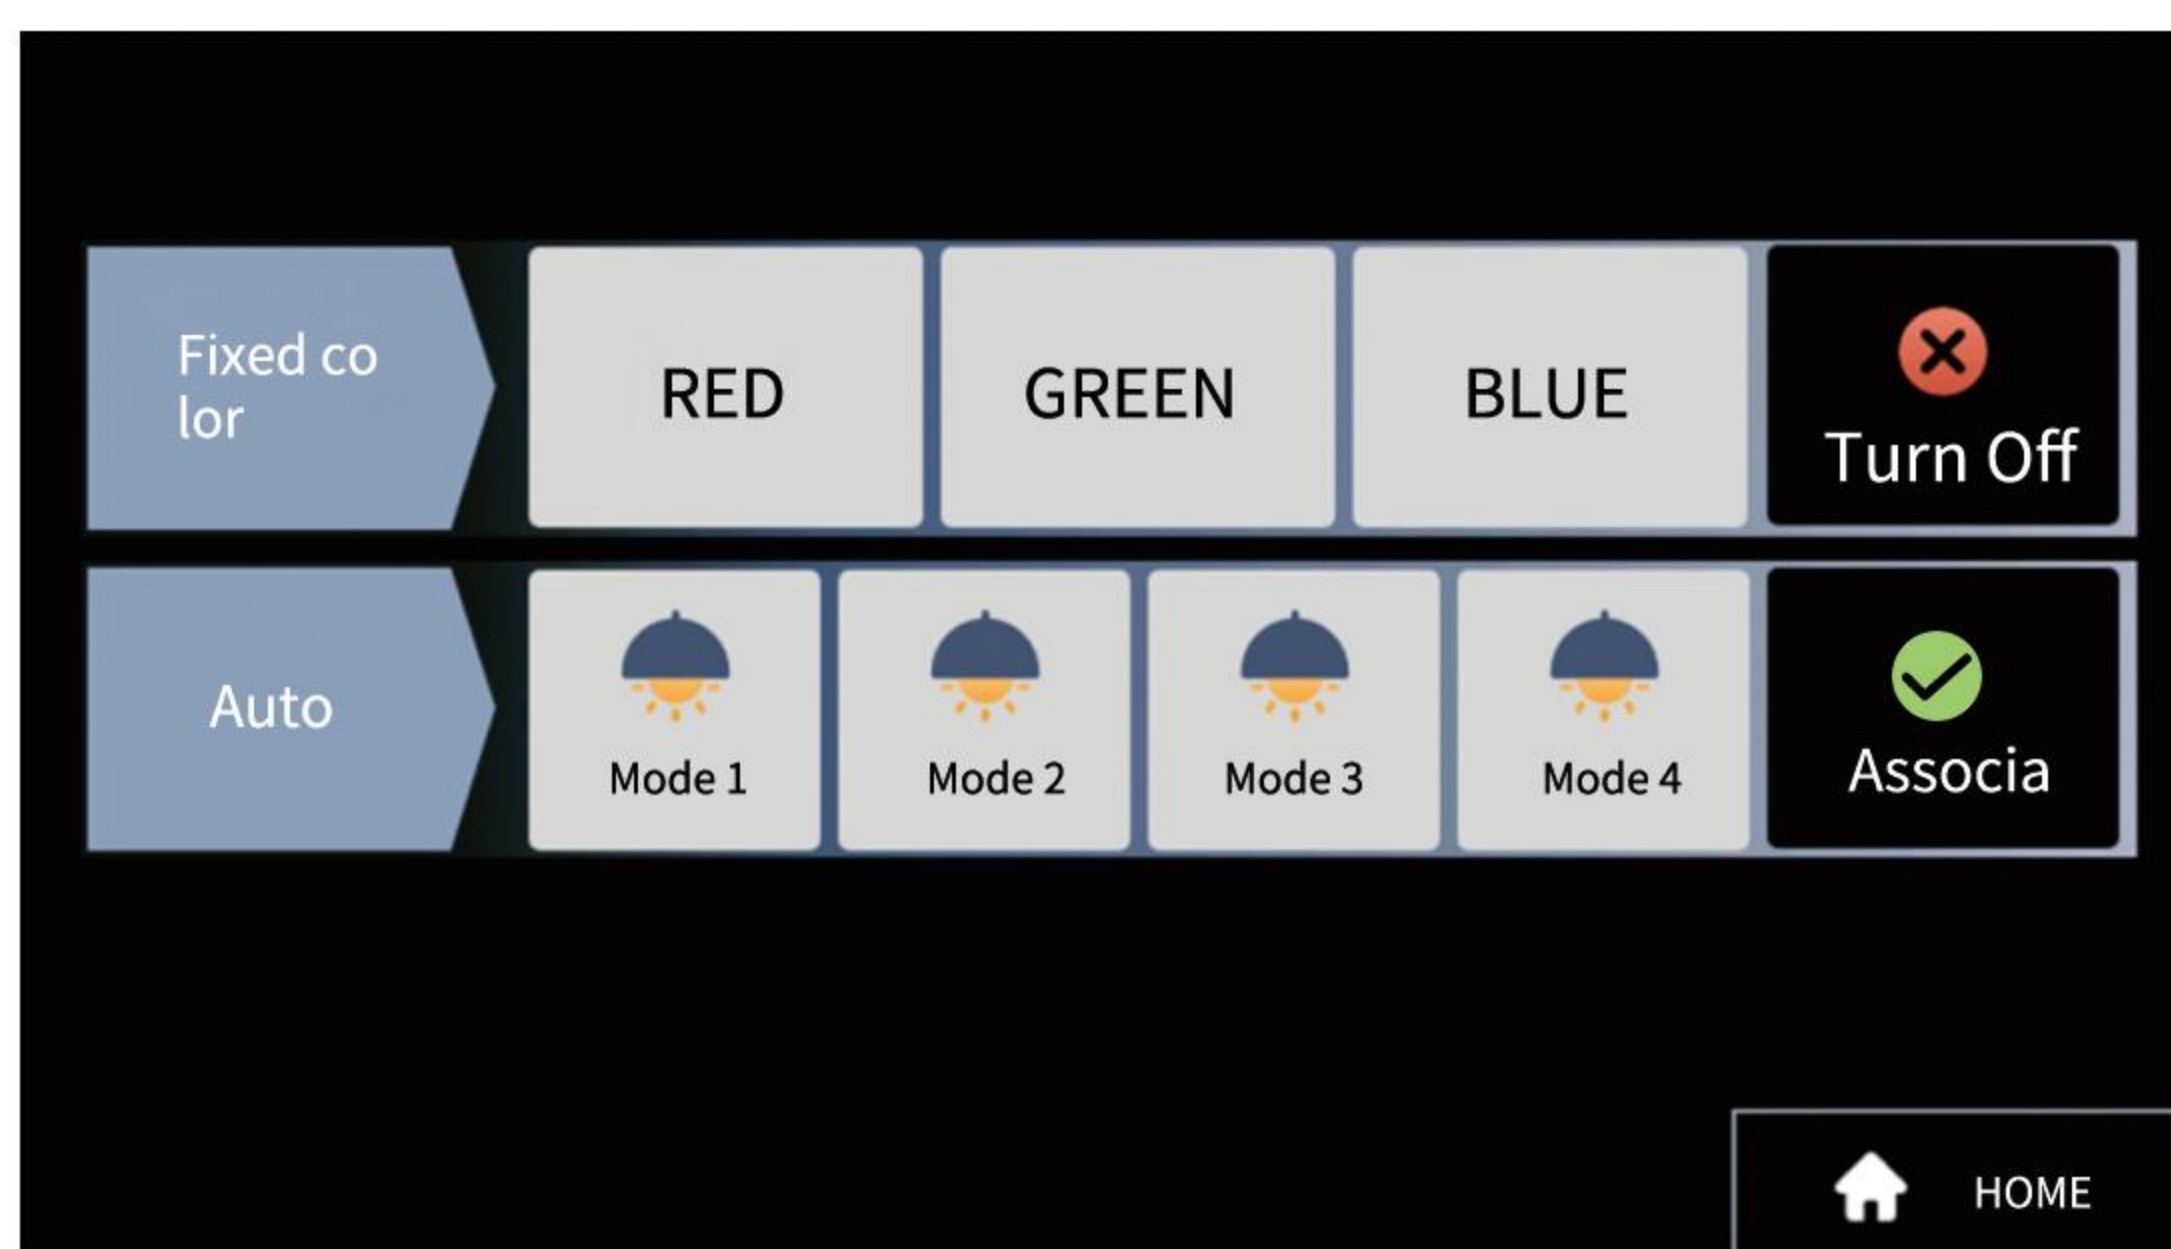

Cleaning time and spin drying time of each compartment can be set separately.

The percentage of ultrasonic running can also be set.

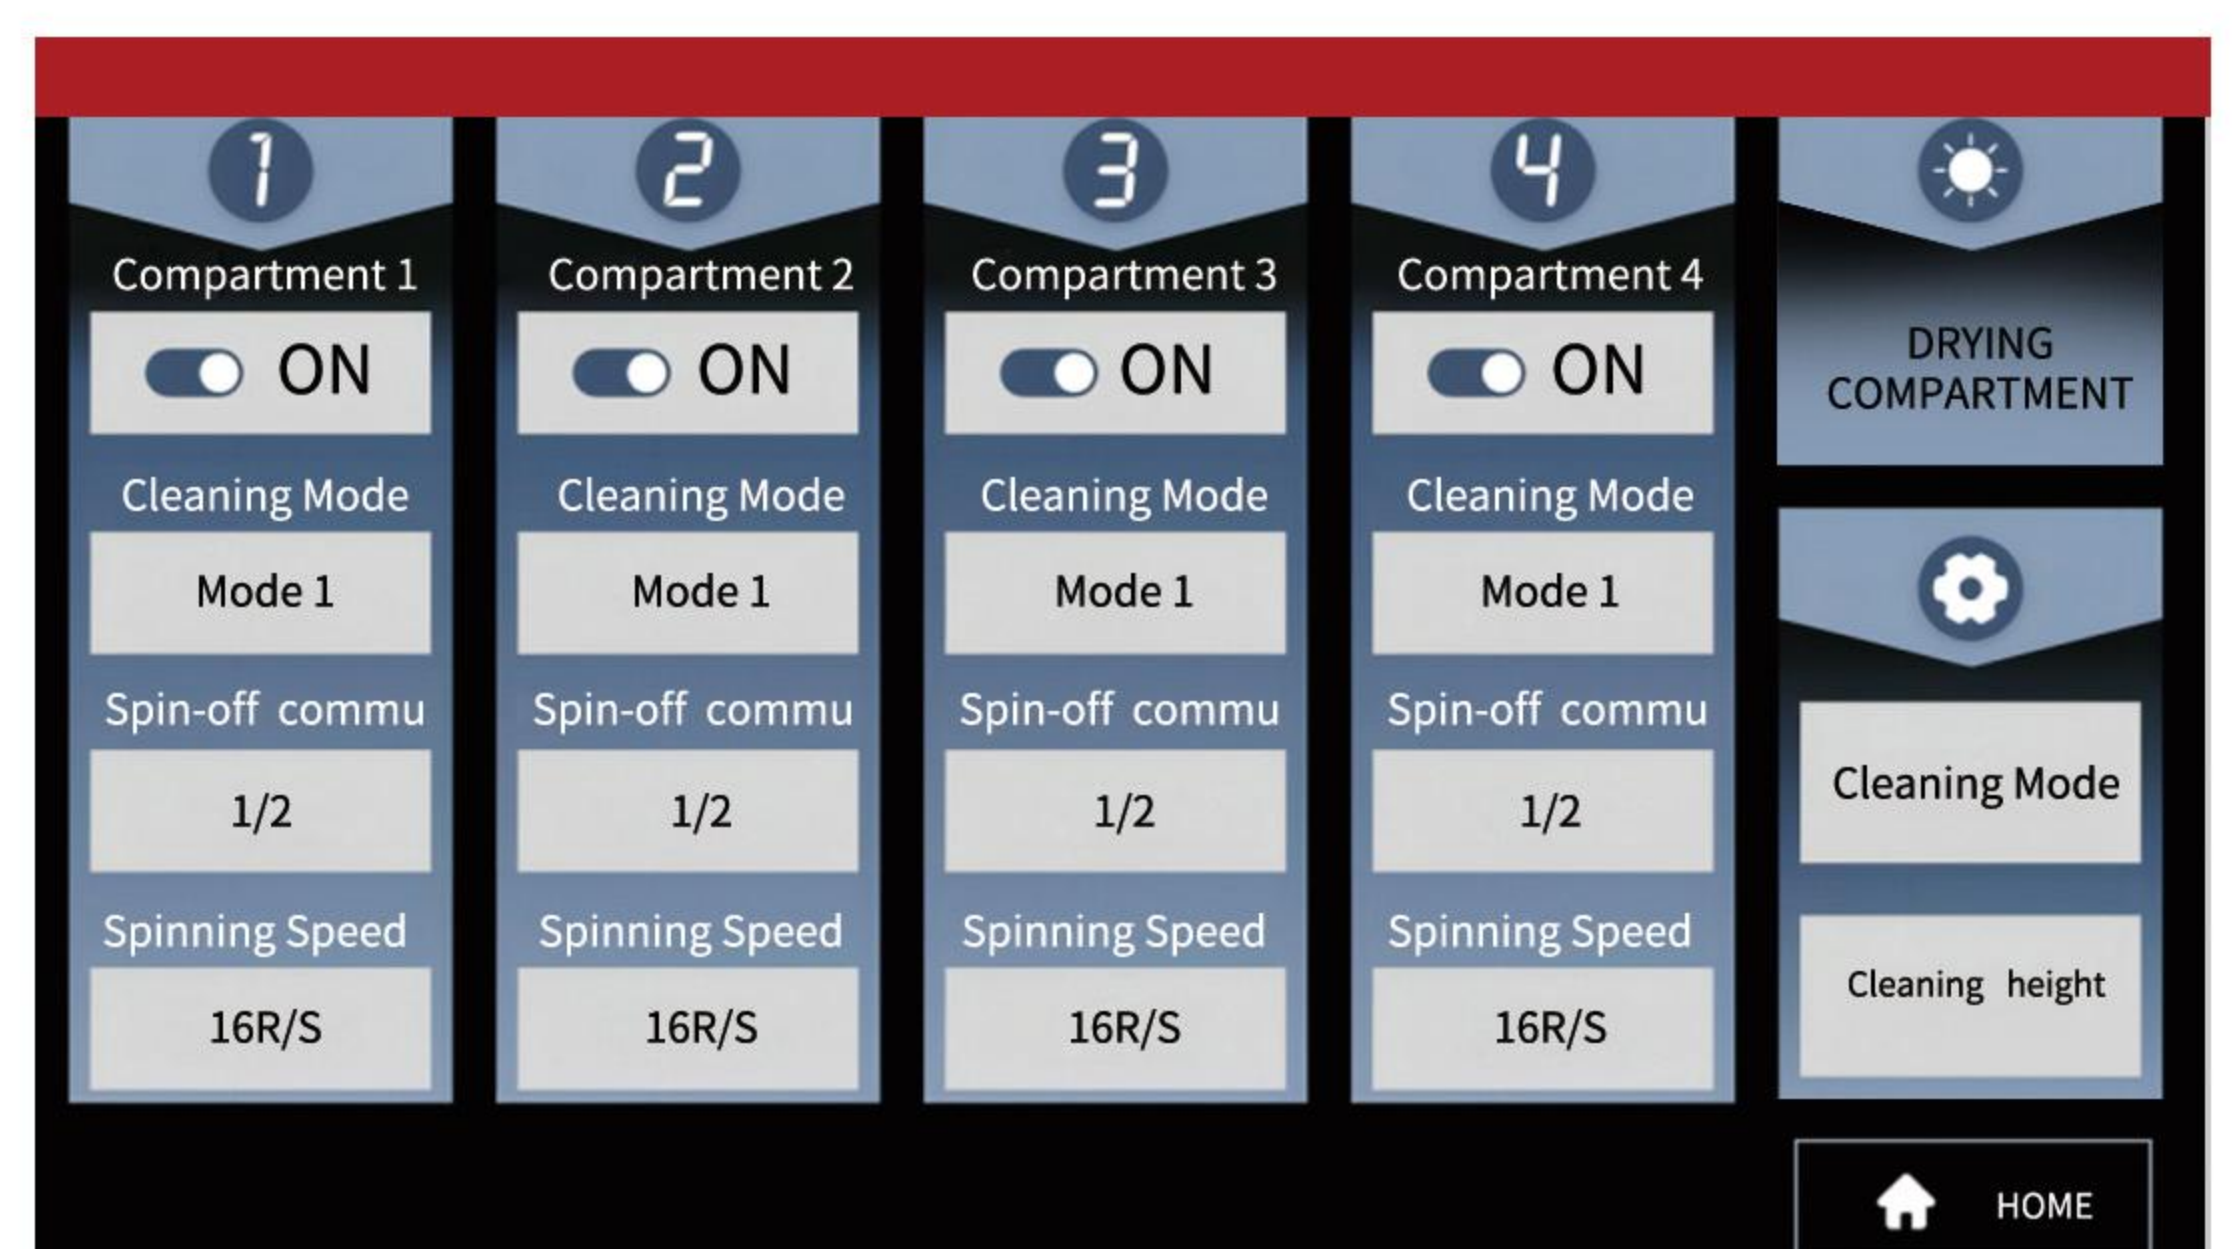

LANGUAGES

Display language: Chinese/Traditional Chinese Character/English.

VARIOUS LIGHTING SYSTEMS

Ambient light can be set and can switch automatically according to rotational speed.

VARIOUS USER-DEFINED CLEANING AND DRYING MODES

Various cleaning modes (cleaning intensity, level of frequency, different levels of ultrasonic waves);
Various drying modes: high heat, low heat and cold air.

DUST-FREE & QUIET

Magnetic door can help reduce noise and ensure safety at the same time. The machine will stop automatically once the door is open.

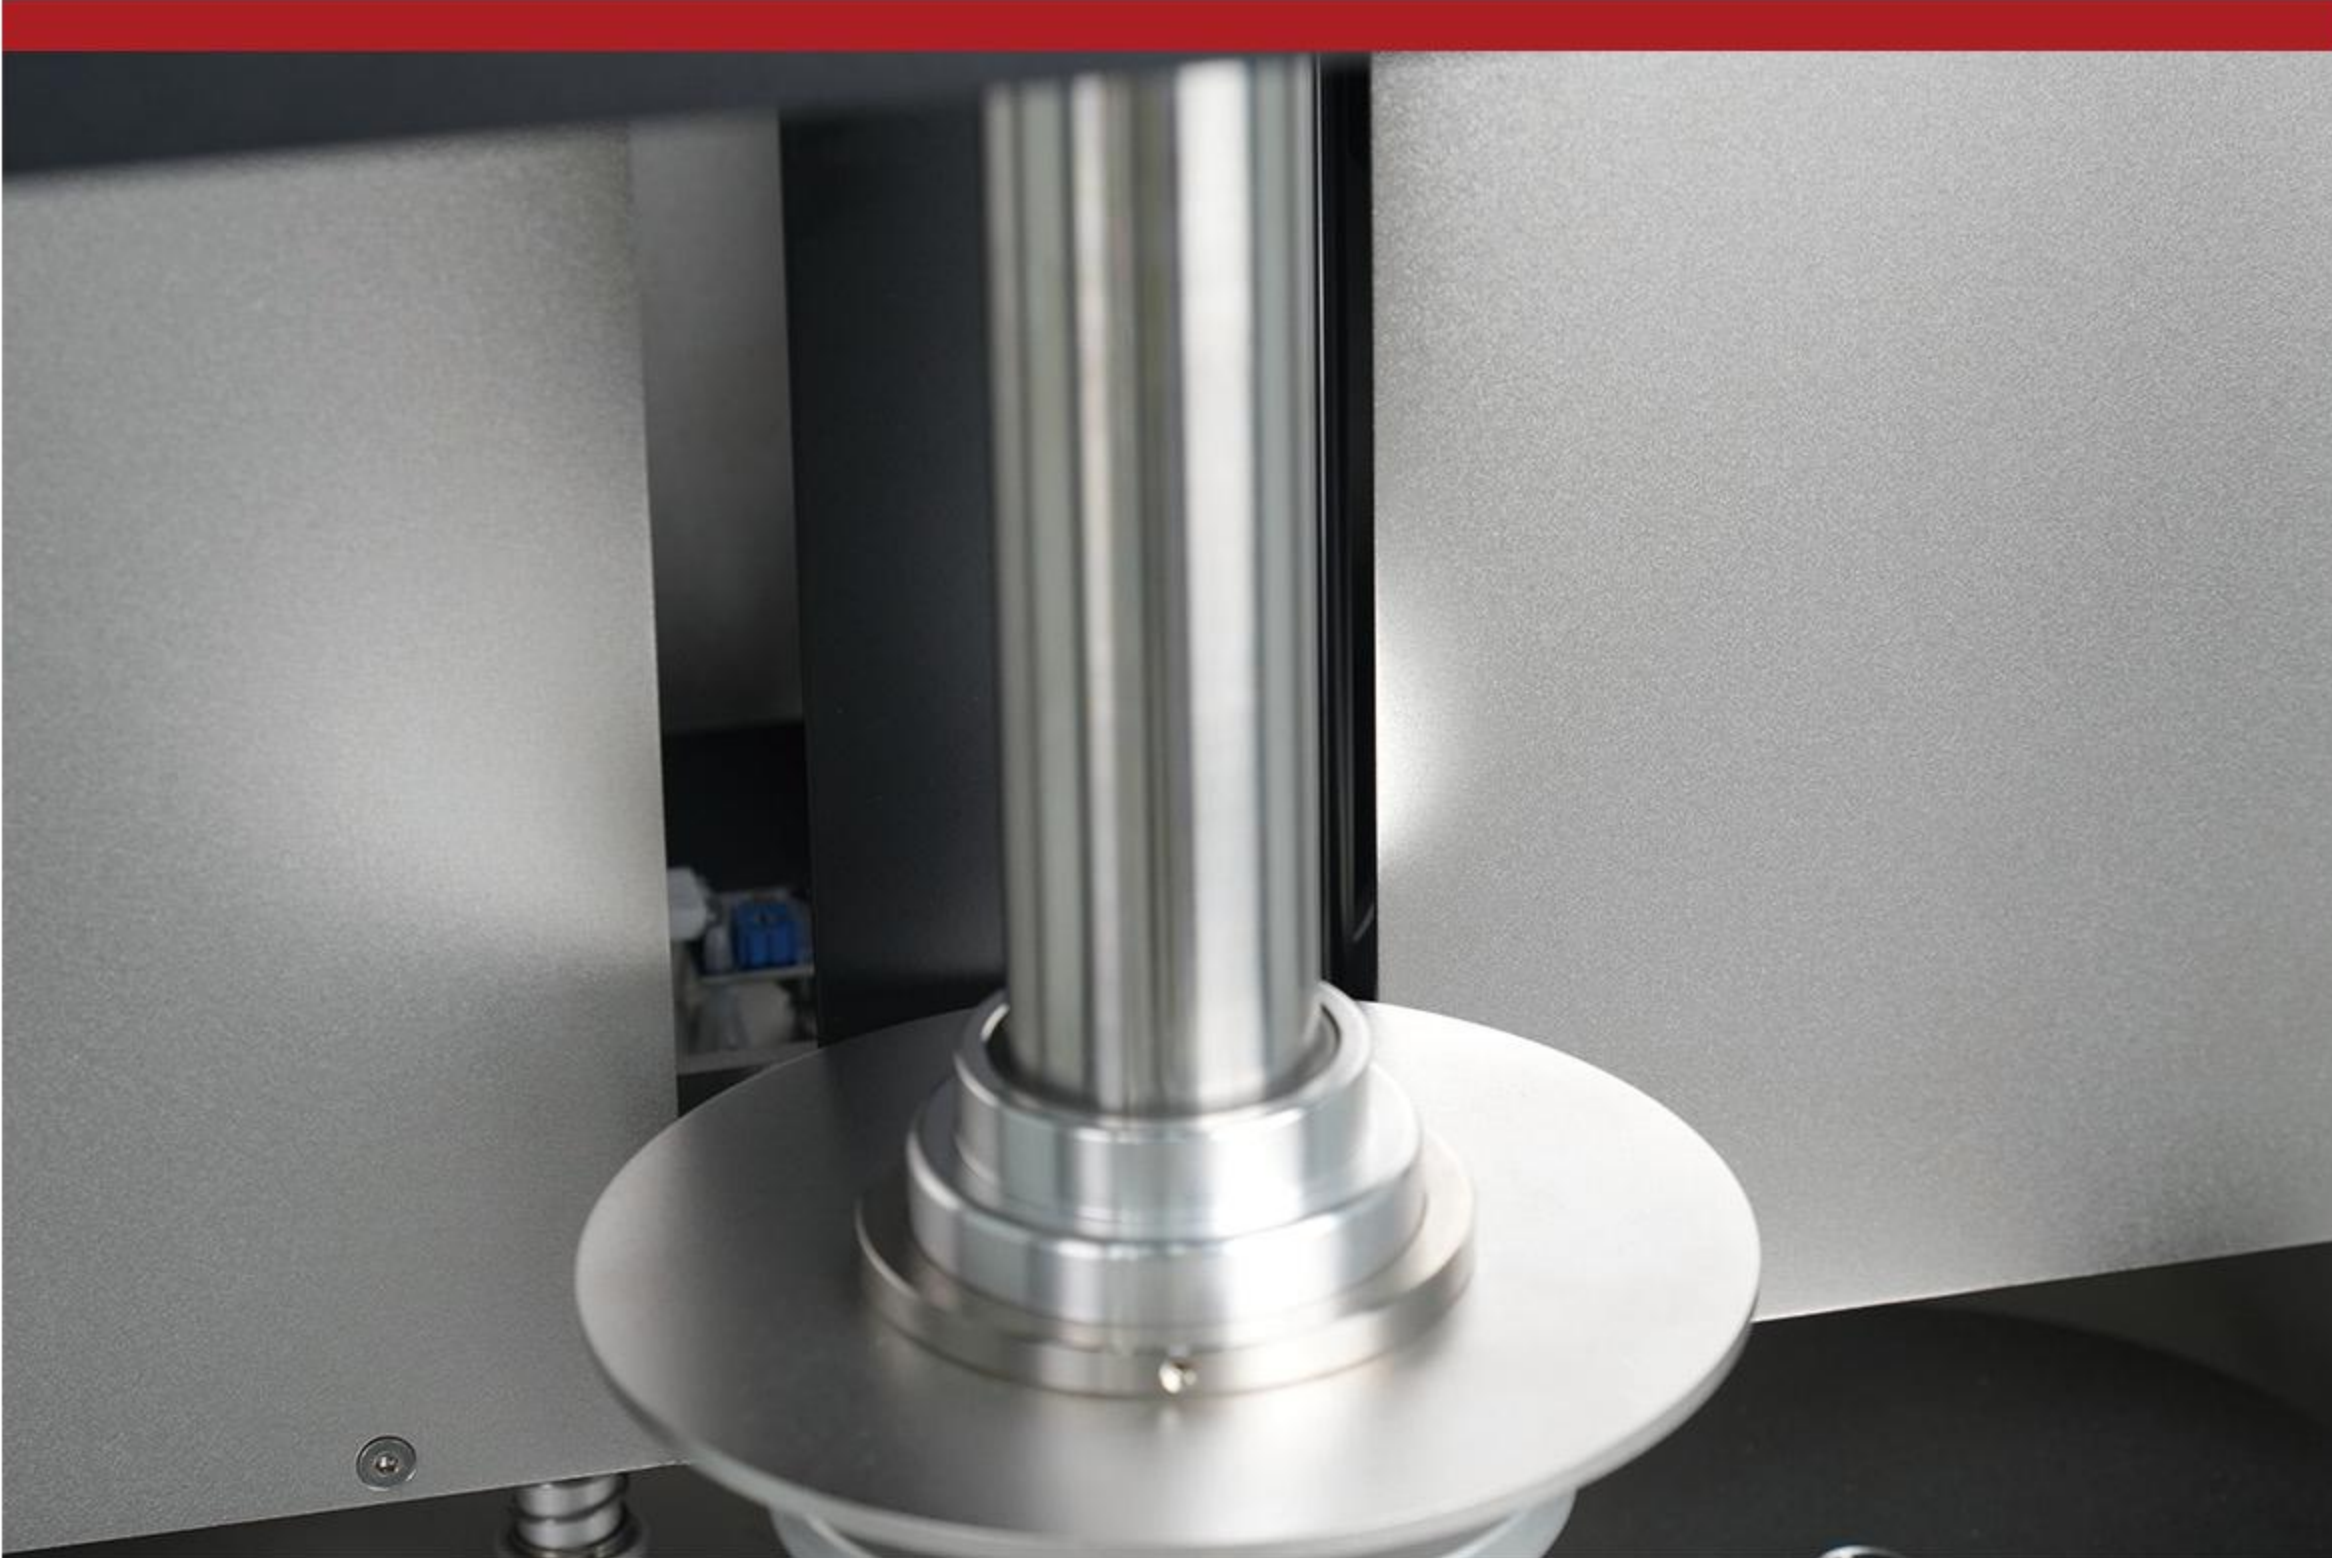

QUALITY MATERIAL

Exquisite hardware manufacturing technique, carefully polished and grinded, and super tough machine body.

E-STOP PUSH BUTTON

Press the button to fix operational mistakes or to stop cleaning immediately.

PRINCIPAL-AXIS BASKET

Newly-designed principal-axis to improve stability.

BASKET DESIGN

Multi-functional basket design, to accommodate all kinds of the watches.

POLISHING TECHNIQUES

Comprehensively improved techniques and all-round polishing to make the baskets shiny and more durable.

MULTIPLE COMPARTMENTS

Four cleaning compartments and the design of drying compartment, to provide perfect one-step solutions.

ULTRASONIC CLEANING

The metal cup is equipped with ultrasonic cleaning, to make watch movements and parts as clean as a new pin.

EXTRA CLEAR GLASS JAR

Stalinite glass jars are not only sturdy and durable, but also allow you to monitor the condition in realtime.
